0895380800356 | andreavindra37@gmail.com | <https://www.linkedin.com/in/ndrvndr> | <https://andreavindra.vercel.app>

Full-Stack Software Engineer with 3+ years of experience in web development. Experienced with React, Next.js, TypeScript, Tailwind CSS, Node.js, NestJS, Express, and PostgreSQL. Focused on building scalable, maintainable, and high-performance applications.

Education

Universal University - Batam, Indonesia
Bachelor of Computer Science, 3.81/4.00

Aug 2019 - Aug 2023

Work Experiences

PT Teknologi Digital Terdepan - Bandung City, Indonesia
Frontend Developer

Oct 2023 - May 2026

We're a trusted software company with a team of experts who can help you with web or mobile app development, UI/UX design, and more.

- **Core Development:** Built scalable web apps via Next.js, React, and TypeScript in Agile environments.
- **Cost Optimization:** Refactored Google Maps code, significantly reducing API billing costs.
- **State & Data:** Managed state and data fetching using Zustand and React Query for performance.
- **Integrations:** Integrated Midtrans (payment), Biteship (shipping), and Google Maps services.
- **UI/UX:** Developed responsive interfaces using Tailwind CSS and Shadcn UI components.
- **R&D:** Researched and adopted latest tech to enhance app performance and developer workflows.

Personal Projects

E-Commerce Storefront

May 2026

A modern, full-featured e-commerce storefront built with Nuxt 4 and Vue 3, powered by a Laravel 13 REST API backend.

- Built a full-featured e-commerce storefront with Nuxt 4 and Vue 3, covering catalog browsing, product filtering/sorting, product detail with color & size variant selection, and stock-aware quantity management
- Implemented a persistent cart using Pinia + localStorage and a multi-step checkout flow with Zod schema validation, saved address management, and live shipping cost calculation
- Handled cookie-based authentication (Google OAuth) with SSR-compatible route middleware, forwarding HTTP-only cookies via useRequestHeaders to protect pages before render on both server and client
- Deployed on Vercel (SSR) with cross-origin cookie configuration against a Laravel API on Render, backed by a Neon serverless PostgreSQL database

E-Commerce Backend

May 2026

A production-ready REST API and admin panel for a modern e-commerce platform, built with Laravel 13, Filament 5, and Cloudflare R2.

- Built a production-ready REST API for an e-commerce platform with catalog, product, stock (color x size variations), and gallery management using Laravel 13
- Implemented hybrid authentication (Google OAuth + Laravel Sanctum) with HTTP-only cookies to prevent XSS, and role-based access control using Spatie Permission and Filament Shield
- Developed an admin panel with Filament 5 and integrated Cloudflare R2 for media storage with automatic cleanup, containerized using Docker (Nginx + PHP-FPM)

Skills

- **Programming Languages:** JavaScript, TypeScript, PHP, Python, and Go
- **Frontend Frameworks:** React (Next.js) and Vue (Nuxt)
- **Backend Frameworks:** Express, NestJS, and Laravel
- **CSS Frameworks:** Tailwind CSS and Bootstrap
- **Testing Tools:** Jest, Vitest, and Cypress
- **Databases:** PostgreSQL and MongoDB
- **Workflow and Collaboration:** Agile, Git, and GitHub
